Review of: "Enhancing Cocoa Crop Resilience in Ghana: The Application of Convolutional Neural Networks for Early Detection of Disease and Pest Infestations"

Adan Antonio Alonso Ramirez

Potential competing interests: No potential competing interests to declare.

Abstract Observations: Since the title mention something about application, I was expected data obtained through results.

Introduction Observations: Looks fine.

Literature Observations: Looks fine.

Methods Observations: Apparently a plot that describe the process, would be good to put on the manuscript.

Results Observations: Please, add data of percentage related to the works that was researched, in a table form.

References Observations: Enumerate the references in order of used through the manuscript.

General Observations: Align the text or justify.
