

Definition

Regular intervention schedule

Behaviour Change Intervention Ontology (BCIO)

Definition: A in which the frequency and duration of Intervention temporal parts are uniform across the course of a BCI or BCI part.

Informal definition: A type of schedule which plans that the duration and frequency of sessions or digital contacts remain constant across the course of an intervention

Curator note: relationship? is about schedule? or is a type of schedule?

This definition was imported from the Behaviour Change Intervention Ontology (see <https://bciosearch.org/>). Comments and suggestions for improvements are welcome using the Qeios review system.

Definitions imported from the Behaviour Change Intervention Ontology (BCIO) are what are known as 'ontological definitions'. See this article in Qeios for an explanation <https://www.qeios.com/read/YGIF9B>.

Ontological definitions can sometimes be hard to read. In those cases we also include an informal definition.

Definitions also often require elaboration to make it clear how they should be used and what they include. In those cases we include a comment.

Also, definitions sometimes require an explanation as to how they came about to help users understand how they relate to alternative definitions. In those cases we include a curator note.
