Potential competing interests: No potential competing interests to declare.

Here are some points to consider:

1. **Structure and Organization of the Article:** The article can be improved in terms of structure and organization. It is important to maintain a clear and logical flow of information. There may be a need to clarify how each project theme relates to specific aspects of human rights.
2. **References and Resources:** The article does not provide sufficient references to support the statements made. It is important to include valid and reliable resources, such as relevant laws, presidential regulations, or related research. This will enhance the reliability and credibility of the article.
3. **In-depth Analysis:** The article only provides a general overview of how each project theme relates to human rights. However, there is no in-depth analysis or research conducted to support these claims. It is important to involve a more scientific and analytical approach in examining the impact of infrastructure projects on human rights.
4. **Broader Context:** The article only focuses on a specific Indonesian presidential regulation (Presidential Regulation 120/2022). It would be better if the article also provided a broader context on human rights issues in infrastructure projects globally. This will help readers understand a wider perspective and relate it to similar issues in other countries.
5. **Practical Implications:** The article can provide deeper insights into the practical implications of implementing this presidential regulation on human rights protection. For example, how these infrastructure projects can affect local communities, how risk mitigation can be carried out, or how oversight and accountability of relevant institutions can be enhanced.

Overall, the article presents an interesting initial framework for discussing human rights aspects in infrastructure projects. However, there is room for improvement in terms of analysis, references, and a broader context to provide a more comprehensive understanding of these issues.
