Dear authors, please make the following necessary changes.

1. Expand HE in the introduction section. Abbreviate each word.
2. In the introduction, you have mentioned numerical values of energies. Give a graphical representation for easy understanding.
3. In the last paragraph of the introduction section, you have mentioned "Finally, we review and discuss policies", rewrite the sentence as if it refers to the third person.
4. Make the content attractive for readers by writing in paragraphs or points.
5. Capitalize the starting letter of each abbreviation. Rewrite "demand response (DR)" as Demand Response (DR), Combined Heat and Power (CHP) systems as Combined Heat and Power (CHP) systems, etc.
6. In page no. 7, rewrite 6.5 m3 as 6.5m³.
7. Capitalize each word in the subsection heading "Social and Environmental Aspects of the Water-Energy Nexus."
8. Write a summary at the end of each section.
9. There are some typo errors. Check them. For example, on page no. 12, section IV, rewrite "searches" as "searches."
10. Check the paper format as the alignment is not proper.
