Potential competing interests: No potential competing interests to declare.

This is a very beautiful manuscript and very interesting to read. However, the authors have not told us about the efforts the Uganda government is making towards increasing women's access to credit for agriculture. This should capture what they have done, what they have not done, and what is left to be done. In addition, the authors can improve the quality of this manuscript by conducting an empirical study to validate or contradict findings from the literature.
