Thank you for inviting me to review this paper that tries to answer the question: How the financial knowledge, financial skill and financial attitude contribute to the Sustainable Development of Micro, Small and Medium Enterprises in Africa.

In order to improve the paper, I recommend to expand the literature review process to have more arguments to support the conclusions of the paper and discussion. Also I suggest to highlight better how their paper contribute to reduce the significant research gap of literature regarding the impact of financial literacy on sustainable development of MSMEs .

Regarding the methodology, it is necessary to explain clearer how was measured the dependent and independent variables used in the model and what testing methods were used. It is not clear what indicator was used to measure the Sustainable Development of Micro, Small and Medium Enterprises in Africa.
