

# Review of: "Risk-Return Analysis of Select Crypto Currencies: During 2018-2022"

Bernice Nkrumah-Boadu

Potential competing interests: No potential competing interests to declare.

## Title

The title can be revised to be "Risk-Return Analysis of Cryptocurrencies"

## Abstract

1. The abstract must be revised. It should include the methods employed, findings and implications of the study.
2. Also, the purpose of the study must be stated well and clear.

## Objectives

1. The objectives should be revised. It should follow the SMART principles.

## Introduction

1. The author does not state the theories or theoretical framework supporting the study.
2. What is the motivation for this study? It should be made clear.
3. The author should provide the findings of the study. He should also let us know how the study is organized.

## Literature Review

1. The literature review should be done line with the revised objectives.
2. The gaps should be made clear and how this study seeks to resolve that.

## Data Analysis

1. The method used in analyzing the data was not known. It was more of descriptive.
2. The author must justify the data span chosen.
3. Engage literature in the discussion of the results.
4. The data sources must be checked.

## Summary

1. The conclusion failed to provide a concise summary of key findings and insights obtained from the study.
2. What is the author's contribution to theory, empiric and policy?

3. The author should suggest areas for further studies.

### **General comments**

1. Correct all wrong in-text citations made. Also use one type of citation style and be consistent.
