Potential competing interests: No potential competing interests to declare.

It is an interesting topic and a good attempt to evaluate the threats and opportunities of the bacterial population.

Suggestions:

1. Reinforce your paper with further literature and discussion in line with the specific objectives.
2. In-depth validation of the results based on related literature and standards is still required.
4. Present both hazards (for human health and the environment) and opportunities (bioremediation) in a clear manner.
