

Review of: "Public health efficiency and well-being in Italian provinces"

Pattrawadee Makmee

Potential competing interests: No potential competing interests to declare.

1. In the introduction section, there is too much writing of well-being definitions. Summarize should taken place.
2. Researcher should write in 3rd person form instead of "I or my study"
3. The report of correlation between indicators (page. 11-12) don't fit with Table 2.
4. Give full word before write only abbreviate.
5. Please provide specific process of the research method and analysis, so that it can easily understand.
6. Please check the sorting number of figure and equation
7. The reported data in table 3-6 seems to hardly understand. What is the data with e "-1.14e-04" mean? Please recheck it again.
8. Page. 23 what are this value 0.915 and 0.633? Where is it in the table?
