Undifferentiated/Unclassified Sarcoma

National Cancer Institute

Source

National Cancer Institute. *Undifferentiated/Unclassified Sarcoma*. NCI Thesaurus. Code C121793.

A term that refers to a heterogeneous group of uncommon soft tissue sarcomas that do not show an identifiable line of differentiation using currently available technologies. This is a diagnosis of exclusion and includes undifferentiated pleomorphic sarcoma (also known as malignant fibrous histiocytoma), undifferentiated spindle cell sarcoma, undifferentiated round cell sarcoma, and undifferentiated epithelioid sarcoma.
