Potential competing interests: No potential competing interests to declare.

The manuscript shows with pretty simple methods the perspective of the educational population about reptiles and the causes behind this behavior. I recommend avoiding the use of terms such as “extremely” or “extrapositive,” including in the title. Suggestion for the title: “Perspectives and actions of students of the Secondary Education Course about non-charismatic fauna.”

In the results section, tables could be replaced by graphics illustrating the number of answers. In addition, statistical significance tests (t-test, Q^2 , etc.) could be performed to support the results.
