Systemic Mastocytosis with an Associated Hematological Neoplasm

National Cancer Institute

Source

National Cancer Institute. *Systemic Mastocytosis with an Associated Hematological Neoplasm*. NCI Thesaurus. Code C9284.

A disorder characterized by systemic infiltration of internal organs by aggregates of neoplastic mast cells and the presence of a clonal non-mast cell hematologic neoplasm (e.g., myelodysplastic syndrome, chronic myeloproliferative disorder, acute myeloid leukemia, and lymphoma).
