

Review of: "Mapping the Canadian Research Landscape in 2023"

Kiran Baidwan

Potential competing interests: No potential competing interests to declare. 1. References are a vital part of scientific publication which is missing 2. Selection criteria for narrowed document is not clear 3. It would be better if data of Govt. & Pvt institute are present in same Tables for better explanation 4. Journals name should be accompanied by its Impact factor likewise author with h-index to evaluate result

1. References are a vital part of scientific publication that is missing.
2. Selection criteria for narrowed documents are not clear.
3. It would be better if data from Govt. & Pvt. institutes were present in the same tables for better explanation.
4. Journals' names should be accompanied by their impact factors, likewise authors with h-index, to evaluate results.
