Potential competing interests: No potential competing interests to declare.

Manuscript entitled "Regulatory Compliance of PCDD/F Emissions by a Municipal Solid Waste Incinerator: A Case Study in Sant Adrià de Besòs, Catalonia, Spain" submitted by Jose L Domingo, Marti Nadal, Joaquim Rovira, can be considered for publication in Qeios Journal, after a major revision.

Here is a list of my specific comments:

1. Page 2, 1. Introduction: municipal solid waste incineration: Replace this title by "Introduction."
2. Page 2, Introduction: Replace "This revision has" with "This study has."
3. Page 2, 2. Case study: the MSWI of Sant Adrià de Besòs (Catalonia, Spain). A description: In this section, some references must be added. Also, a figure with the geographical localization of the studied area must be included in this section.
4. Page 3, 3. PCDD/Fs in samples of air, soils, and herbage in the vicinity of the MSWI of Sant Adrià de Besòs: This section is too descriptive and should be systematized. The results should be included in tables/figures. Also, these results must be clearly discussed.
5. Page 8, 4. Discussion and Conclusions: Divide this section into two parts: Discussion and Conclusions.
