

# Review of: "Sujok Tririgin Therapy For Chalazion: Case Reports"

Kelly Fernanda Molena<sup>1</sup>

<sup>1</sup> Universidade de São Paulo

**Potential competing interests:** No potential competing interests to declare.

This case report is interesting but needs major revisions to be published.

**Title:** "A Report of Two Cases"

**Abstract:** Incomplete. What is the purpose? Methods are confusing; rewrite the text. Results and conclusion are also incomplete.

**Introduction:** The text is in the wrong order. The definition of chalazion disease has to be before the explanation. What is the prevalence of the disease? The purpose needs to be rewritten.

**Methods:** Where were these cases conducted? The methodology is fine but needs to be improved in grammar.

**Results and Discussion:** There is a lack of references. In the first paragraph, the authors do not cite any articles. Are there other studies in the same field? The author does not mention.

This article could be more explored and bring robustness in the writing and in the grammar.
