Myelodysplastic Syndrome with Excess Blasts

National Cancer Institute

Source

National Cancer Institute. *Myelodysplastic Syndrome with Excess Blasts*. NCI Thesaurus. Code C7506.

A myelodysplastic syndrome characterized by the presence of 5-19% myeloblasts in the bone marrow or 2-19% blasts in the peripheral blood. It includes two categories: myelodysplastic syndrome with excess blasts-1 and myelodysplastic syndrome with excess blasts-2.
