The research is interesting. Some what, there are certain part that can be improve:

1. the term "survey" can be suggest to change to the "participatory visual" methodology.
2. This study mentioned about their parents fear, but there was no explanation on the parent contribution/discussion in methodology.
3. Terms "analysis" is suggest to change to "result"
4. There was no discussion section, it is good to discuss the results with the previous research findings to strengthen or to compare the results
