Title & Abstract

1. Do the title and abstract cover the main aspect of the work?

- The title should be revisited. Create a title that describes the contents of the article. Keep the title short and concise.
- Keywords sort by alphabet
- Abstract needs to be revised. Abstract contents: problems, objectives, methods (design, samples, instruments, data analysis), results, and conclusions.

Introduction

2. Does the introduction provide background and information relevant to the study?

- It is suggested that the introduction ends by mentioning the research objectives.
- Research questions can be explained in the methodology section.

Formulation of the Problems

3. Research questions can be explained in the methodology section. Research questions must be in sync with the research objectives.

Material and Methods

4. Are the methods clear and replicable? Do all the results presented match the methods described?

- There is no methodology in this article. The methodology should be written in an article.
- Article content must consist of IMRAD? The IMRAD (Introduction, Method, Result and Discussion) method is known as one of the writing structures used by many scientific article writers because this structure is widely accepted by many reputable scientific journals.

Results

5. The research results must answer the research questions and research objectives. Sort the answers according to the research question.

6. There is no explanation for the results section in this article. If this article uses the library review method, the results can be combined with the discussion, for example results and discussion.

Discussion

7. If this article uses the library review method, the results can be combined with the discussion, for example results and discussion.

Conclusion

8. Conclusions should answer the research objectives.

References

9. References must be updated with the latest references, no later than the last 5 years for research articles.

10. The reference used must include the DOI URL.

Recommendations to the Editor

10. Recommendations to Editors:

- a. Major correction, acceptable for publication after researchers make some improvements.
- b. There are several errors or typo in writing. The author must do proofreading for this article before submitting.
