Potential competing interests: No potential competing interests to declare.

This paper provides information regarding the coronavirus in pets in different areas and provides detailed information about causes and treatment as well as precautions from the virus.

This paper provides good insight regarding the coronavirus in pets.

Authors describe all the perspectives of the virus (causes and treatment, history) and it is well written.

The abstract provides a concise view of the paper and the conclusion provides a brief overview of the paper.

Some improvements are required in writing the Risks of COVID-19, such as grammatical errors like sentence creation and more data required for result justification.

The methodology section completely defines the paper.

The results section requires more data for justification or to prove the results.

No additional data is required, but more cases of COVID-related pet data are needed.

In the section on the risks of COVID, sentence-related issues are present in the first section.

The Role of Pet Animals in Zoonotic Transmission of SARS-CoV-2 section shows the strength of the paper.

Rewriting the Risks of COVID-19 would provide a better impact or improve the quality of the paper.

Recent developments in SARS-CoV-2 diagnosis in animals require more data.

Data related to COVID cases in pets and infection to humans.

Sentences are written in a technical way.

COVID case-related data.

First paragraph, first three sentences.

COVID Data.

The paper provides a comprehensive overview of the coronavirus in pets, detailing causes, treatments, and precautions. The abstract offers a concise summary, while the conclusion effectively encapsulates the paper's findings.

Strengths:

- **Comprehensive Coverage:** The authors thoroughly discuss the virus's causes, treatments, and history.
- **Methodology:** The methodology section is well-defined and supports the paper's objectives.
- **Key Sections:** The section on the role of pet animals in zoonotic transmission is particularly strong.

Areas for Improvement:

- **Grammatical Errors:** The section on the risks of COVID-19 contains grammatical errors and sentence structure issues.
- **Data Justification:** The results section requires more data to substantiate the findings.
- **Recent Developments:** The section on recent developments in SARS-CoV-2 diagnosis in animals needs additional data.

Overall, the paper provides valuable insights into the role of pets in the transmission of SARS-CoV-2. Addressing the identified areas for improvement, particularly in data justification and grammatical accuracy, would enhance the paper's impact.
