

Review of: "Regulation data for the horizontal jump of children and adolescents"

Vitor Marques

Potential competing interests: The author(s) declared that no potential competing interests exist.

Abstract

- How was the horizontal test performed and evaluated? An application was used?
- This children and adolescente is familiar or trained with test?
- Present the inclusion and exclusion criteria

Materials and Methods

- All students accepted to participate in the study?
- I suggest the presence of a flowchart of participation in the studies;
- Did studies with other countries use the same methodologies?
- Did the children or adolescente perform any familiarization for the test?

Results

- What are regions of the multicentric studies?
- Was the difference in relation to other countries significant?
