Potential competing interests: No potential competing interests to declare.

Abstract:

The abstract can be shortened somewhat, adding a comparison between the remaining methods referred to in this research, and giving a summary of their advantages and disadvantages of using them.

Introduction

The introduction contains many literary reviews of previous research and basic theory, but the research does not contain a comparison table for those researches to clarify what each research offers in order to know what the weak points are, and the novelty of the research is not clear based on the results of the previous research presented.

Research Findings

The author needs to add diagrams or charts that show the teachers' varied teaching techniques.

References

The number of research should be reduced, and the focus should be on the most important and most recent ones.
