Potential competing interests: No potential competing interests to declare.

1. The authors can add the effect of global desertification on human life. How about the effect of desertification on the social economy? Effect on natural resources?
2. How about the land use in dryland areas? What is the domination of the agriculture sector in dryland areas?
3. This article still lacks data, so the author can add data about the rainfall in watersheds, water needs, land degradation, and social data: poverty, and crop failure.
4. The author can explain the effect of IWSM on poverty reduction and how effective the program is in reducing poverty.
