

Review of: "Implications of Large Class Size on Effective Teaching and Learning in Nigerian Tertiary Institutions: Lecturers' Perception"

Shrikanth Muralidharan

Potential competing interests: No potential competing interests to declare.

Hello,

The paper is written well. Here are a few suggestions -

1. The introduction is too long. Sentences which mean the same can be merged together.
2. The introduction can end with the research question.
3. Since it's an exploratory study and based on attitude or response, you can consider to do away with the hypothesis.
4. Flow of methodology can be improved a bit. You can add a flow chart to showcase multistage sampling
5. In LMIC huge classrooms are a challenge, you can add more on role of global education and plans for LMICs also.
6. Some of the suggestions may be practically not feasible, do reflect on the same.
7. Discussion can be improved more. It's just elaboration of the results. Critical aspects can be added to improve the outcome.
8. There are a few models/studies to handle large classrooms efficiently. Reflect more of those can fit in your set up and if it is feasible.

Regards

Wish you the best!
