# Insulin Sensitizer S-707106

National Cancer Institute

## Source

National Cancer Institute. *Insulin Sensitizer S-707106*. NCI Thesaurus. Code C116320.

An orally available protein and insulin sensitizer with anti-hyperglycemic activity. Upon oral administration, S-707106 increases the sensitivity of target organs to insulin, through an as of yet not fully elucidated mechanism. This agent may lower blood glucose levels.
