**Potential competing interests:** No potential competing interests to declare.

Abstract presented the essence of research report that includes background, research problem, methods used, research results, conclusions, & implication.

- generally based on the maximum number of words 250 words.
- The problem is the gap (a phenomenon) between the plan (something desired) with the existing situation (reality); both theoretical and practical gaps.
- This question needs to have an element that drives the researchers to discuss, important, useful and realistic from the point of critical and creative.
- It is described briefly including theories, research findings, conclusions or scientific discussion seminars, or experience (observation) of researcher with the subject matter studied.

Theoretical Review consist of:

- Theoretical Foundation
- Theoretical Findings which Relevant to the research problem.
