# E-RC1

National Cancer Institute

## Source

National Cancer Institute. *E-RC1*. NCI Thesaurus. Code C19871.

A chromatin-remodeling complex that contains the BRG1, BAF170, BAF155, and INI1 homologs of yeast SWI/SNF subunits, as well as a unique subunit, BAF57. E-RC1 appears to be critical for chromatin remodeling and Beta-Globin transcription by EKLF.
