

Peer Review

Review of: "Phenotypic Characteristics and Factors Associated with Assaf Lamb Body Weight and Morphology"

Victalina Arredondo¹

1. Faculty of Veterinary Medicine and Zootechnics, Universidad de Colima, Mexico

The manuscript presents interesting information; however, relevant information about the data analysis is omitted, and the description of the results is incorrect. Furthermore, the conclusion should be adjusted to the results obtained in the study. My decision is that major corrections should be made.

Specific comments and corrections can be seen in the attached file.
