

Review of: "Cross-national associations of IQ and infectious diseases: Is the prevalence of Corona an exceptional case?"

Francesca Romana Lenzi

Potential competing interests: No potential competing interests to declare.

The study is original, clear, concise in analyzing the relation between IQ and the spread of infectious diseases. The emphasis on Corona as an exceptional case is addressed with in-depth analysis. From a methodological point of view, the research is based on tools that allow to reach conclusions of academic and scientific interest.
