**Potential competing interests:** No potential competing interests to declare.

The subject of the article seems to me to be very pertinent and timely; however, I find some inconsistencies in the structure of the article.

-I consider that a more concrete review of the literature and the state of the art is missing.

-In terms of the wording of ideas, at some points, statements are made without support.

-The analysis of the data is very open, and therefore, it is difficult for the article to have a more solvent discussion and conclusion.
