The topic should be "The teaching of Apostle Peter and its Relevance to The Christian Religious Education in Bantul Regency and Gunung Kidul Regency Yogyakarta". The name of the country needs to be added to the topic

In the abstract you stated that you used 'quantitative'. Please this is a biblical research. Your topic has a TEXT and a CONTEXT. Quantitative could be used for the CONTEXT but not the text. So what method did you used for the text?

The abstract is not a scientific abstract. There is no statement of problem, aim, clear method, recommendation

The first line of the introduction reads "This election is said to be according to God's plan." Please which election?

The introduction looks like a story book epilogue. Please in introduction you SHOULD mention the aim, background of the study, the relationship between the TEXT and the CONTEXT, the aim and objectives. If you carefully look at your introduction you will discover that you do not have anything on your topic. You were just preaching. Nothing about CRE in Bantul Regency and Gunung Kidul Regency Yogyakarta.

Under the subject RESEARCH METHODOLOGY, you did not state which of the quantitative methods you used in the CONTEXT. You did not state the research design, data collection, data analysis.

The section HYPOTHESIS TEST should be move to stay immediately after RESEARCH METHODOLOGY.

Please separate the RESULTS from DISCUSSION.

Thank you. Please make the work more scientific, with less preaching.
