# Crooke Cell Adenoma

National Cancer Institute

## Source

National Cancer Institute. *Crooke Cell Adenoma*. NCI Thesaurus. Code C154342.

A corticotroph adenoma composed of tumor cells with Crooke hyaline change. Ring-like cytokeratin expression is typical of these neoplasms. ACTH expression is dislocated to the cell periphery and juxtannuclear region. Ultrastructurally, intermediate filaments are arranged in a ring-like pattern. (WHO 2017)
