Small Intestinal Adenoma

National Cancer Institute

Source

National Cancer Institute. *Small Intestinal Adenoma*. NCI Thesaurus. Code C5340.

A neoplasm that arises from the glandular epithelium of the small intestine. It is a polypoid or flat circumscribed lesion. Morphologically, it is characterized by a proliferation of neoplastic glandular cells and it is associated with dysplasia. According to the growth pattern, it may be classified as tubular, villous, or tubulovillous.
