Review of: "Populating Dark Sectors with Relativistic Bubble Walls"

Marco Merchand¹

1. physics, Royal Institute of Technology, Sweden

Found the following minor typos/inconsistencies in the text:

1. In the paragraph above equation (1), the nucleation condition should read

$$H^4 = \Gamma$$

2. There is no L_w in eqn 10. However, below eqn (10), it says that L_w appears explicitly in the equation.
3. Fig. 7 is referred to after fig. 4. I suggest moving and relabeling the figures around such that they appear in the correct order.
