Potential competing interests: No potential competing interests to declare.

1. Article Title	: The title of the article is too long and not scientific. Maybe it could be shortened further.
2. Abstract	: The abstract does not explain the research methods used or the research objectives.
3. Ask the problem/Introduction	: Does not provide in-depth references about the study area, for example, examples of events that occurred due to the impact of climate change and data related to it.
4. Methodology	: It does not fully explain research methods such as population size, how to draw samples, mathematical equations or formulas used, and so on. Questionnaire questions should be written in this section.
5. Research Results and Discussion	: Does not clearly explain the results or more specific research findings related to the impacts of climate change. Does society understand climate change, and so on? It needs to be written in more depth in this section.
6. Conclusion	: Conclusions are written precisely and interestingly.
