Phosphoinositide 3-Kinase Adapter Protein 1

National Cancer Institute

Source

National Cancer Institute. *Phosphoinositide 3-Kinase Adapter Protein 1*. NCI Thesaurus. Code C147051.

Phosphoinositide 3-kinase adapter protein 1 (805 aa, ~90 kDa) is encoded by the human PIK3AP1 gene. This protein is involved in linking the B-cell receptor and toll-like receptors to the phosphoinositide 3-kinase (PI3K)-Akt signaling pathway.
