Komogorov-Smirnov Test

National Cancer Institute

Source

National Cancer Institute. *Komogorov-Smirnov Test*. NCI Thesaurus. Code C53250.

Either the Kolmogorov-Smirnov one-sample test, a goodness-of-fit test, that tests whether an observed dataset is consistent with an hypothesized theoretical distribution or the Kolmogorov-Smirnov two-sample test, a test of the null hypothesis that two independent samples have been drawn from the same population (or from populations with the same distribution).
