Potential competing interests: No potential competing interests to declare.

The author has produced an article describing and taking a snapshot of a relevant issue in the educational context in Nigeria. I consider that the paper is very focused on the internal school situation in Nigeria, even if this problem can be found in other parts of the world, I suggest that the author could also extrapolate the relevance of this study in general to make it interesting for an international audience.

In terms of structural aspects of the paper, the abstract and keywords are correct, the introduction I suggest that it explains much better the Nigerian context; literature review. The methodology is also very clear, as well as the discussion and conclusions.
