Review of: "A Security Framework for the Mobile Application Using Color Barcode"

Debajit Sensarma[1]

1 Vidyasagar University

Potential competing interests: No potential competing interests to declare.

i) The organisation of the paper can be improved.

ii) The proof of security has not been discussed properly.

iii) The literature survey portion can be more informative.

iv) The figure number is not properly given.

v) The literature survey is good but contains old references.

vi) The results and discussion parts are missing.

vii) The conclusion part is also not available.

viii) Also, some future directions of the work can be discussed.
