Author have done a good job but only essential corrections needed before publications. I will be happy to revise it and check all these.

1. Introduction: There should be section wise representation of all headings included in a single para at the end. Try to identify the work related to climate change and sustainability.
2. LR: I unable to see the research gaps and objectives. Please include latest references which will give you an idea of work in different sectors. Few important papers needs to be added: DOI: 10.4018/978-1-4666-5202-6.ch022 ; <https://doi.org/10.1504/IJBPSM.2015.073770> ; Green supply chain management: A case of sugar industry in India. 3. Methodology: Please check for proper citation of figures and tables in the text. Few of the latest papers in which SEM and similar methods done should be cited in the text like: <https://doi.org/10.1007/s10479-023-05431-1> ; <https://doi.org/10.1111/opec.12287> ; <https://doi.org/10.3390/horticulturae8111018> ; <https://doi.org/10.1504/IJVC.2022.122164> ; <https://doi.org/10.1177/097226292211432> ; <https://doi.org/10.3390/w15122274>
4. Implications should be added in this (Political, Practical and Social if any).
5. Conclusion part is written in very short. Compare your study with other authors and write in conclusion and extend a bit more.
6. Limitations and future work should be included as a separate heading or may be a part of conclusion also in the last para.
