Excellent work, we can recognize Authors' efforts in updated version. But in my opinion it is still need more explanations of "building a digital republic" as the title shows. this point is still need more highlighting. when we talk about digital republic and its building, especially the Authors mentioned about digital identities, So what are these digital-IDs and its domains(Authentication, Authorization, identification). finally, I hope the Authors show briefly examples with important points only. Also I noticed the Authors mentioned about "informal sector" in Abstract this term really confused me what are these?" Bribe or Black Market or..". I hope these points are helpful and GOOD LUCK.
