Potential competing interests: No potential competing interests to declare.

The title is good with the following limitations

1. lack of a scientific abstract formulation
2. lack of required technical data for solar PV and Pico hydro power
3. lack of necessary working diagrams and descriptions in the “development of pico and solar generation” sections
4. no indication of how to improve access for essential appliances with a 50Wp solar
5. no new approach/optimization techniques for payback period minimization
