Potential competing interests: No potential competing interests to declare.

1. I recommended the authors to improve the Introduction.
2. In Material and Methods, the number of participants should be included in 2.2 Study population and sampling technique.
3. Data collection instrument should be included in the paper, at least as supplementary material.
4. Results, I recommended the authors to divided they when the explain the different results, to facilitate the reading.
Also, that results must be improved because they are poor.
5. Discussion also must be improved.
6. The references are old, I recommended to include more recently published paper.
