

Review of: "Flood Prediction Using Artificial Neural Networks: A Case Study in Temerloh, Pahang"

Akhmad Afandi

Potential competing interests: No potential competing interests to declare.

1. Abstract can be more succinctly written. Abstract should be expanded sentences related to the results. The results of the study should be given as numerical percentages.
2. The paper should be also supported by a literature search including relevant and recent papers. The following articles related to ANN may be cited.
 - a. <https://www.sciencedirect.com/science/article/pii/S2214157X22005524>
 - b. <https://journalmt.com/pdfs/mft/2023/05/11.pdf>
 - c. <https://doi.org/10.1155/2021/5576600>
3. Which activation function was used in the ANN model?
4. Training and test data should be given with a table.
