Recombinant Transforming Growth Factor-Beta 3

National Cancer Institute

Source

National Cancer Institute. *Recombinant Transforming Growth Factor-Beta 3*. NCI Thesaurus. Code C1847.

A recombinant agent, which is chemically identical to or similar to the endogenous cytokine transforming growth factor-beta-3 (TGF-beta-3). TGF-beta-3 modulates cell growth and immune function and may promote or inhibit tumor growth, depending on the tumor cell type; this agent may also suppress host immune system recognition of and/or response to tumor cells. (NCI04)
