# Diethylstilbestrol Dipropionate

National Cancer Institute

## Source

National Cancer Institute. *Diethylstilbestrol Dipropionate*. NCI Thesaurus. Code C74557.

The dipropionate ester of a synthetic, nonsteroidal form of estrogen. A well-known teratogen and carcinogen, diethylstilbestrol inhibits the hypothalamic-pituitary-gonadal axis, thereby blocking the testicular synthesis of testosterone, lowering plasma testosterone, and inducing a chemical castration.
