It is an honor for me to review a Manuscript entitled; " The Nexus between Energy Policies and Supply: A Descriptive Evaluation of Nigeria and UK Energy Sectors". The author made an extraordinary effort, but few useful suggestions can improve the research write up. Following points can be considered for the improvement of the Manuscript before its acceptance for the publication.

1. Your introduction is insufficient. The purpose of your article and why such an article is needed should be explained in more detail.
2. For the research of the existing literature, it is necessary to improve the amount of literature, and summarize the existing research.
3. It's suggested to add contribution and innovation.
4. Conclusion should be enriched with further analysis. Policy recommendations should be supported with more in-depth content. Limitation is missing in this part. It must be clarified explicitly.
