Potential competing interests: No potential competing interests to declare.

1. Concentration of Heavy Metals in Drinking water of Hawassa Zuria Woreda, Sidama Region, Ethiopia was studied by other Researchers and Published in Ethiopian Journal of Medical and Health Sciences in the year 2021. What are the 'Research gaps' found for the further research, must be incorporated clearly in this article. Because the Research gaps are very weak in this article.
2. Most of the parameters considered for the study is similar to the pioneer study.
3. What are the common diseases spread over the study area and what is the source for this information which enforced for the current research? It would be nice if some basic information and sources are included in the article.
4. There are almost 'Nine number of Tables' cited in the article. But No Tables found. How the discussion was made using the Table numbers?
5. Why the sub-titles (Background, Methods, Results) are given in Abstract? It also similar to the said published article.
6. The article shows 47% Plagiarism level (when checked using the Licensed Plagiarism Checker) and this high level of Plagiarism is usually not accepted for the publication. So the contents of the article can be revised by the authors.
