Brain calcification, Rajab type

INSERM

Source

INSERM. (1999). Orphanet: an online rare disease and orphan drug data base. <u>Brain</u> <u>calcification, Rajab type</u>. ORPHA:178506

Brain calcification, Rajab type is an inherited disorder characterized by widespread calcifications of basal ganglia and cortex, developmental delay, small stature, retinopathy and microcephaly. The absence of progressive deterioration of the neurological functions is characteristic of the disease.
