Potential competing interests: No potential competing interests to declare.

Greetings and Regards,

- 1- Merge background and aim
- 2- There should be semicolons between keywords
- 3- The manuscript text should be justified and arranged
- 4- The table reference should be entered in each row
- 5- The quality of manuscript figures should be increased as much as possible
- 6- In the conclusion section, bring similar studies of others, compare and check their results with your own results
- 7- The English language level of the manuscript is good, but it should be strengthened as much as possible before publication

Good luck
