University of New Mexico Cancer Center

National Cancer Institute

Source

National Cancer Institute. *University of New Mexico Cancer Center*. NCI Thesaurus. Code C105629.

The mission of the University of New Mexico Cancer Center is to reduce the burden of cancer incidence and mortality by discovering the genetic, environmental, social, and behavioral factors that contribute to the distinct cancer patterns and disparities in the American Southwest; translate its scientific discoveries to novel diagnostic, screening, prevention, and therapeutic tools and clinical trials; and assure that all New Mexicans have access to outstanding cancer treatment and clinical trials. It became an NCI-designated cancer center in 2005. It is a University of New Mexico center.
